

Amendments to the Specification:

In the section entitled "Detailed Description of the Preferred Embodiment," please replace paragraph 1 on page 12, beginning on line 3, with the following amended paragraph:

As seen in Fig. 9, a ~~space between~~ recess 70 is formed by the trailing edge 44 of the lock cutting tool, the bar 20 and the first impact collar 26 and the rearward extending elongated bar 20. This recess can accommodate a metal bar 106 such as a metal window or door security bar, making the lock removal tool 10 useful for removing such security bars.
